“Let SkyFlex Solar Fans Cool Your Home with the Power of the Sun Today!”

*Specifications are subject to change without notice.*
Compare the features and benefits of the SkyFlex Solar Fan for yourself.

**How it works**

The SkyFlex Solar Fan is designed to extract trapped attic heat & humidity by propelling a fan to replace it with cool fresh air provided by the vents around the perimeter of your home.

- **100% Solar Powered**
  Cools your home with the power of the sun. No electricity or electrician required.

- **Extends Roof Life**
  Extreme attic temperatures damage your roof’s underlayment. Extracting this heat prolongs the lifespan of your roof.

- **Decreases Energy Costs**
  Air-condition duct work running through the attic can compete with temperatures in excess of 160°F. By reducing this temperature your air conditioner will work more efficiently, which can decrease cooling costs.

- **Reduces Heat, Humidity and Mold**
  Hot, humid, non-moving air is a breeding ground for mold and bacteria. Improved ventilation keeps this air moving and replenishes it with cool fresh air that can prevent unwanted contamination.

**Quality Components You Can Trust**

Industry-leading 12 or 36 Watt tiltable solar panel

Commercial-grade seamless aluminum with powder-coated interior and exterior

High-performance custom DC motor with isolation bracket ensures quiet operation

5-wing precision balanced aluminum fan blade for optimum CFM output

Stainless screen allows maximum flow while deterring unwanted birds and critters

Sealed rain deflector

Venturi-effect seamless aluminum flashing provides optimum airflow

Optional automatic thermostat is preset to +/- 85°F

---

**WARRANTY**

Mineral coverage, oftentimes 5-10 years or less. Consumer is required to disassemble product and return unit, then wait for replacement if covered by out-of-area provider.

Industry best. A 25-year limited warranty certificate is issued with each solar attic fan. See written warranty for details.

---

**SOLAR COLLECTOR**

Fixed in flat position. Cannot be aimed towards the sun. No airspace between panel and building causes panel to be exposed to extreme temperatures.

Adjustable solar panel can be positioned toward the sun for maximum exposure and performance. Unique design allows air to cool the solar collector and housing.

---

**HOUSING**

Uses various types of plastic throughout the fan which become brittle and crack from sun exposure. Use of steel can rust and corrode.

No plastic used throughout the entire product. Only top quality commercial-grade aluminum is powder coated inside and out for superior protection.

---

**MOTOR**

Various models made in China and other foreign countries. Noisy operation and found to be unreliable with time.

---

**FAN BLADES**

Poor construction made of more plastic components which become brittle and crack when exposed to heat over time.

---

**EXHAUST SCREEN**

Made of plastic which will crack when exposed to heat allowing rodents and insects to penetrate into your home.

Stainless-steel construction will not crack like plastic, preventing even the most ingenious critters from entering.

---

**AIRFLOW ARCHITECTURE**

Basic design provides mediocre CFM performance and shall life due to plastic parts and foreign assembly (up to 800 CFM).

Increased performance with water/air design offers the ultimate CFM output (up to 1,628 CFM).

---

**WATER RESISTANCE**

“Galvalume” flashing can rust over time. Some manufacturers even use plastic flashing that can crack.

One-piece aluminum flashing provides seamless design paired with unique sealed rain guard to deflect water during extreme weather.

---

**OUTPUT**

Minimum output rated at 10 Watts, or occasionally 22 Watts. Some brands do not even publish a CFM rating for you to review.

Superior performance with the available 36-Watt model provides maximum ventilation up to 1,628 cubic feet per minute.

---

**COMPANY**

Family-owned and operated for over three decades. We offer the best overall experience with local service, support, and custom-tailored solutions for your home.

Online shopping, box stores, or out-of-area providers offer less customer service.
